# Tour of Cagliari

In Cagliari, the sea is not a border. A beach, more than five kilometers long, runs alongside the city. Surrounded by Devil's Saddle, unmistakable promontory, Poetto is the "beach of the hundred thousand."

But Cagliari is not only sea. The ancient cathedral, a little farther on, holds and preserves in its Museum, precious treasures, testifying centuries of history. The imposing ramparts lead to the elegant promenade, from which one can enjoy a breathtaking view. Heritage is now enriched by several spaces which house temporary exhibitions and events. Wandering in the streets of the city, immersed in testimonies of the past, is equally exciting.
