

FRIDAYS OF THE UNIVERSE

Once again this year, the INFN renews its participation in the series of seminars *Fridays of the Universe*, organized by the [INFN Ferrara division](#) and the [University of Ferrara](#), in collaboration with the [Astrophiles Group "Columbia"](#) and [Esploriamo L'Universo](#).

The 2025 edition will take place at **Sala Estense, in Piazza del Municipio, Ferrara**, featuring six events

from January 24 to April 4.

January 24, 9:00 PM

Integrated knowledge, creativity, and innovation: a modern symbiosis between scientific and humanistic disciplines

With **Paolo Dell'Aversana**, *geophysicist and project manager at ENI*

February 7, 9:00 PM

Flying into the future: a new era of space exploration

With **Walter Villadei**, *astronaut*

February 21, 9:00 PM

Gravitational Astronomy: the cosmic symphony and the search for hidden melodies

With **Maria Alessandra Papa**, *LIGO*

March 7, 9:00 PM

From Schrödinger's cat to the wonders of quantum technologies

With **Catalina Curceanu**, *INFN - LNF*

March 21, 9:00 PM

Superpowers with Superphysics: or with great powers come great (scientific) questions

With **Alberto Quaranta**, *University of Trento*

April 4, 9:00 PM

Is it possible to revolutionize diagnostic radiology 130 years after the discovery of X-rays?

With **Sandro Olivo**, *University College London*
